

Aerisguard Range Hood Coating

FEATURES OF THE AERISGUARD RANGE HOOD COATING

- World's first coating membrane meeting the regulated cleaning requirements of commercial kitchen range hoods
- 50% labour reduction in application over caustic cleaning - saves time and money
- Simple re-application - peel off and respray only - saves more time and money
- HACCP approved - "food safe and suitable for use in food handling facilities"
- OH&S Safe - existing caustic cleaners are dangerous and toxic
- Non toxic - safe to use indoors with no odours
- Fast - only requires a single coat and dries in minutes
- Long lasting - 6 months cleaning performance before retreat required
- Simple - caustic cleaning requires water run-off control and multiple rinses
- Saves water - no hosing or rinsing required

Peels off easily for simple reapplication

International validation of the core AerisGuard technology
